INTERNSHIP

Web Development Intern

(June 2025 – July 2025)

Selected for a hands-on internship focusing on web design and development principles. Engaging in real projects to enhance practical skills and professional growth.

PROJECTS

- **MatchMarry - Find Your Life-Partner — MERN STACK** (July 2025)
 - Full-Stack matrimonial platform, enabling partner discovery based on preferences.
 - Implemented real-time chat with Socket.io, profile viewing, auth, and match filtering with a responsive UI.
- **GlucoGPT: Your Smart Diabetes Companion** (2024 – Present)
 - Built a Logistic Regression model to predict diabetes risk using Kaggle health data.
 - Promoted early detection and health awareness through ML insights.
- **ChatChameleon - Make Anonymous Friends — MERN Stack** (Nov 2024)
 - Built a real-time chat platform using React, Node.js, Express.js, and Socket.io.
 - Implemented user authentication, real-time messaging, and notifications.
- **My Portfolio — React.js, Tailwind CSS** (April 2025)
 - Developed a fully responsive personal portfolio showcasing my profile, projects, and achievements.
 - Used React.js for component-based architecture and Tailwind CSS for rapid styling.
